Nithin Reddy Kadaru

FULL-STACK SOFTWARE ENGINEER
Spring City, PA | 334-372-9961 | nithin12.reddy@outlook.com
linkedin.com/in/nithin-reddy-kadaru

PROFESSIONAL SUMMARY

Full-stack Software Engineer experienced in building enterprise C#/.NET, Java/Spring Boot, and Angular applications on SQL Server and AWS. Designed and developed an end-to-end warehouse management and order fulfillment system and .NET 10 services that integrate two billing systems. Strong in REST API design, OAuth 2.0 security, automated testing, Continuous Integration/Continuous Delivery (CI/CD), and mentoring newer engineers.

TECHNICAL SKILLS

Languages: C#, TypeScript, SQL, Java, HTML, CSS
Frameworks and Libraries: .NET Core / .NET 5 / .NET 10, ASP.NET Core, Entity Framework Core, Angular, Blazor, Spring Boot, Spring Security
APIs and Architecture: Object-Oriented Programming, REST APIs, Microservices, OAuth 2.0
Databases: Microsoft SQL Server, PostgreSQL, MySQL, MongoDB
Cloud and DevOps: AWS (Lambda, Cognito, ECS, S3, Secrets Manager, Elasticsearch/Kibana), CI/CD pipelines (GitLab, Octopus Deploy), Git
Testing and Tools: Unit and Integration Testing, JUnit, Mockito, Postman, Visual Studio, Agile/Scrum, AI-assisted development (Kiro), LLM integration (Google Gemini)

PROFESSIONAL EXPERIENCE

PROGRAMMER | CTDI
October 2022 - Present

- Designed and developed an end-to-end warehouse management and order fulfillment system in C# and .NET, from requirements gathering with clients and stakeholders through inventory tracking, order processing, and fulfillment workflows.
- Built .NET 10 web services as a translation layer that normalizes data formats across 2 billing systems, enabling 2 separate applications to exchange data consistently.
- Developed and maintained C# and ASP.NET Core REST APIs with SQL Server and Entity Framework Core data layers, stored procedures, and functions across .NET Core 3.1, .NET 5, and .NET 10 applications.
- Implemented authentication with AWS Cognito and managed credentials in AWS Secrets Manager; built and deployed cloud features using AWS Lambda, ECS, S3, and Elasticsearch/Kibana.
- Wrote automated unit and integration tests and maintained GitLab CI/CD pipelines with Octopus Deploy releases across development, QA, staging, and production environments.
- Mentored and onboarded new engineers on the codebase, tooling, and coding standards.

SOFTWARE ENGINEER | Tata Consultancy Services (TCS), United States
October 2021 - October 2022

- Designed and developed RESTful microservices in Java and Spring Boot for the HFO wealth management project at PNC Private Bank Hawthorn, translating requirements from product owners, designers, and stakeholders into layered controller, service, and data-access designs.
- Built a microservice that retrieves account information together with family member details and generates reports for each family, with a database storing family member details and page-access records.
- Secured endpoints with Spring Security and OAuth 2.0, implementing token-based authentication and role-based authorization so only people authorized by the main account holder can access a family's page.
- Implemented REST endpoints with request validation and exception handling, integrated with the Angular application, and developed reusable Angular components and services that consumed them.
- Wrote JUnit and Mockito tests covering service logic and exception scenarios to catch defects before release.

PROJECTS

WORKOUT SCHEDULER | Angular, TypeScript, .NET 10, AI Agents | github.com/NKadaru/Schedule_Workouts

- Built a full-stack workout scheduler with Angular 20 (TypeScript) and a .NET 10 API, integrating WHOOP via OAuth 2.0.
- Built an AI agent on Google Gemini that reads WHOOP recovery data and adapts daily workout plans.

EDUCATION

MASTER OF SCIENCE, COMPUTER SCIENCE | Texas State University | San Marcos, TX | August 2021

BACHELOR OF ENGINEERING, COMPUTER SCIENCE | Osmania University | Telangana, India | May 2018
